ABOUT XRP HEALTHCARE

The first Pharma and Healthcare platform to be built on the XRP Ledger – XRP Healthcare (XRPH) is an innovative, scalable solutions company utilizing Web3 technology to revolutionize the way people access and afford healthcare services globally.

XRPH are focused on improving the lives of individuals and families with the ethos of providing:

- A decentralized marketplace for pharma and healthcare services.
- Faster payment transactions worldwide via our mobile app.
- Help inhabitants of pharmerging countries access standard healthcare via faster payments.

 XRP Healthcare® in partnership with  SPIRITUS MEDICAL

THE WORLDWIDE PHARMA AND HEALTHCARE MARKET

The worldwide pharma and healthcare market was valued at US \$1.48 trillion in 2021 and is expected to reach US \$3.21 trillion by 2030 at a Compound Annual Growth Rate (CAGR) of 8.98%.

Rising global health care spending is expected to be driven by the growth in the pharmaceutical market across the pharmerging economies. These countries are characterized by high life expectancy and aging population with rising chronic disease prevalence.

Pharmerging countries consist of China, Brazil, Russia, India, Algeria, Argentina, Colombia, Bangladesh, Indonesia, Mexico, Nigeria, Uganda, Pakistan, South Africa, Poland, Philippines, Turkey, Romania, Chile, Kazakhstan, and Vietnam to name just a few.

With a combination of population and GDP rising across these countries, we believe that XRPH is well positioned to help these developing economies with our technology accessible to anyone with a smart phone.

Global spending on medications worldwide in 2010, 2021, and the projected amount for 2026:

As more people get access to healthcare worldwide, spending on medicine is expected to continue growing. By 2026, 1.8 trillion U.S. dollars is forecasted to be spent on medicines globally.

XRPH'S DECENTRALIZED MARKETPLACE

Traditional drug distribution channels are largely inefficient, whilst a small number of pharmaceutical companies hold a monopoly over the entire process. The adoption of blockchain technology will prevent unscrupulous parties from misusing, creating cartels, and thus exploiting networks and processes.

XRP Healthcare will provide users with a decentralized platform that exists outside centralized banking systems, allowing for more transparent and secure transactions.

We have created our own native cryptocurrency token (XRPH) which will be the utility for users of our decentralized marketplace to buy an ever – expanding range of pharmaceuticals, healthcare products, and services, covering conventional as well as alternative medicines such as Blood type nutrition, CBD oil, tinctures, and isolates – including traditional and non – traditional medication for all types of ailments.

The first partnership to be listed on the XRPH decentralized marketplace is ScriptCo, which is the first and only pharmacy in America selling medications at a cost price, saving its customers thousands of dollars each year. This partnership will enable the integration of ScriptCo's Pharmaceutical store into the XRPH Web3 decentralized marketplace.

To help with the ongoing demand of our decentralized marketplace, we will continue to partner with various health-focused organizations and pharmaceutical companies, enabling them to benefit from the unique features and functionality of our platform.

XRP FAST PAYMENTS/TRANSACTIONS

XRPH mobile app will:

- Enable swift, low cost and dependable transactions of value anywhere in the world.
- Be a way of sending funds and setting up the distribution of medication to friends and family, especially in developing countries who may find it hard to access medical prescriptions, healthcare insurance, and general medical treatment.
- Simplify and create fast payment transactions between market participants in the pharma and healthcare industry.
- Allow users to send and receive funds in seconds outside the banking system.

MEDICINAL CANNABIS & CBD MARKET

The global cannabis market is forecasted to grow from \$28.266 billion to \$197.74 billion by 2028. Yet currently, several cannabis companies are struggling. Banking is an area of concern for MRBs (marijuana - related businesses). Although the general stance on the MRBs has improved, the banking system has remained sluggish. The reluctance to issue bank accounts has hampered the industry since legitimate businesses cannot function legally without a bank account. This restrictive access to traditional banking processes makes payments from clients almost impossible. Cryptocurrencies, like XRP therefore, introduce a luminous chink of light, in a dim world of cash dependency, being able to send and receive funds in seconds outside the banking system, as long as they are licensed sellers / dispensaries.

XRP HEALTHCARE AFRICA

As a subsidiary of XRP Healthcare, the company has been specifically formed to deal with acquisitions and mergers - XRP Healthcare Africa is the vehicle that invests in privately owned clinics, care homes, pharmacies, and hospitals with a focus on the African continent. The company aims to create a premier healthcare system that resides under one roof, with access to improved systems, doctors, and medical provisions. True to our vision of helping pharmerging countries access better medical provisions, will also utilize the XRPH token for sending and receiving payments in its newly formed healthcare environment, as well as telepharma, i.e., booking appointments with doctors, counselling, therapy sessions, purchase of medication and treatment.

XRPH PRESCRIPTION SAVINGS CARD

The XRPH Prescription Savings Card can be used to save up to 80% on prescriptions / medication in 68,000 national and regional U.S based pharmacies we have partnered with – including Walmart, CVS and Walgreens.

Users are rewarded in XRP Healthcare’s native token XRPH each time the card is used.

All XRPH rewards will be distributed solely by XRP Healthcare.

WHY WAS THE XRPH TOKEN ISSUED?

The founders at XRP Healthcare set out to avail themselves of the attributes of XRPL, by building a Scalable Health Service on top of the XRP Ledger. Especially due to the requirement of needing a first-class, and sustainable payment system, void of the limitations of Bitcoin.

The XRP Ledger encourages people to build and innovate upon it, and as a consequence, they have developed a strong and open-source platform for launching the most demanding projects.

Naturally the integrity and future of the developing XRPH ecosystem demands that it retains sovereignty over its own digital asset, and thus over its decentralized marketplace and the elements connected therein.

Furthermore, the XRPH token will have the additional uses:

- * The transfer of money
- * A payment mechanism
- * Data verification
- * Smart asset management
- * Branding — having its own cryptocurrency supports the brand value of XRPH
- * Financial dexterity

Why we chose to build on the XRP Ledger?

The XRP Ledger brings efficiency and speed in how health care services can be conducted with B2C and B2B.

Transactions can be processed in 3 to 5 seconds and for as little as \$0.0002.

	Speed per transaction	Cost per transaction	Scalability transactions per second
 XRP LEDGER	3-5 secs	\$0.0002	1500 TPS
 BTC	45 mins	\$1.88	16 TPS
 ETH	4.49 mins	\$0.46	16 TPS
 DASH	15 mins	\$0.39	10 TPS
 LTC	12 mins	\$0.12	56 TPS

- The fastest and most scalable blockchain protocol in the world.
- Transaction speeds of up to 1500 transactions per second.
- Transactions can be processed in 3 to 5 seconds for as little as \$ 0.0002.
- Processes more transactions than VISA or Mastercard.
- The XRPL can scale up as needed by adding new servers around the world, allowing it to handle an unlimited number of transactions with minimal delay.
- One of the most secure blockchains in existence due to its use of advanced encryption techniques, which protect against attacks and unauthorized access.

- High transaction throughput - meaning that it can handle many transactions at once without slowing down or stalling.
- The XRPL's low transaction fees and cost savings make it a great choice for businesses looking to save money while still maintaining the security of their transactions.
- Fully decentralized - no single entity controls it, instead, the users of the ledger control it by voting on changes to its protocol.

MEDIA RELATIONS

Cision is a leading global provider of earned media software and services to public relations and marketing communications professionals. XRPH have partnered with CISION the leading provider of public relations and marketing to utilize their existing network of crypto and blockchain journalists for specialist press/marketing and strategic promotion of our brand, vision, and concept across all relevant media platforms, together with our superfast lightweight HTML website that is built for speed. Our focus is to develop and grow the XRP Healthcare to better serve our community and keep them up to date with key developments and partnerships.
